CONNECT MERCHANT PAYMENT SERVICES TO SELL AMERICAN EXPRESS ONEPOINT PROGRAM

Connect Merchant Payment Services (CMPS), a Riverside, CA payment processor, says it is now selling American Express-card acceptance to smaller merchants using the AmEx OnePoint program. Under OnePoint, merchants can view their AmEx transactions combined on a single statement that contains all of a merchant's card brand transactions. While AmEx retains authorization for transactions made with its cards, CMPS says it will process and handle payments for merchants in the program.

Connect says it will be able to support these merchants, too, but pricing continues to be set by AmEx. CMPS' external and internal sales agents, will be selling one point, unlike most direct bank processor's which do not allow their affiliated independent sales organizations to sell one point.
